Supply-chain alerts

CRITICAL — Typosquatted dependency detected. <code>com.fastxml.jackson.core:jackson-databind:2.9.8</code> impersonates the legitimate <code>com.fasterxml.jackson.core:jackson-databind</code> . The groupId is missing the letters "er" — a classic typosquatting pattern. This coordinate does not exist on Maven Central and fails to resolve. A real package at this coordinate could execute arbitrary code at build or runtime. Remove immediately.
HIGH — Untrusted HTTP repository. <code>http://insecure-mirror.example.net/maven2</code> is declared as a Maven repository using plain HTTP (no TLS). This enables man-in-the-middle artifact injection attacks where a network attacker can substitute malicious JARs for legitimate ones at download time. Remove or replace with a verified HTTPS endpoint. Enforce artifact checksums and signatures.
